Want to watch the movie but it won't launch when I click "watch" on steam. I've seen the movie and know it's great but my wife hasn't and I figured we could watch it. Please fix your stream steam!

EDIT: Jenkmeister pointed out that if you're using Steam Beta Client the movie won't work. I opted out of Beta Client and IT WORKS NOW! Thanks again buddy!. This is a very well written game with many missions and no bugs. Simple to play but challenging. My highest recommendation. Worth every cent. :). As a fan of space games, and the Homeworld aesthetic I was drawn to this game. It's beautiful, fun, and not stressful to take 5 - 10 minutes playing.. I said I'd write a review for this game on one of the steam forms and by god I'm going to

I haven't had a game challenge me and make me laugh like this in a long time

Tiles is an amazing smart fun game with so much fun to be had great sound track great idea and great map creator and community map player local mp works perfectly its everything it looks like no hidden stuff nothing just a small fun little game

it feels like the developer wanted this game and said "you know what I'm gonna make myself a game and maybe others will like it to" it feels like a great game to point to and say that right there's a good indie game I'd say it was worth every cent I paid for it and I'm happy to support the developer. I love this demo. I see how it is easy to get motion sickness from. Just take your time and look straight when you're moving. I really want a Deus Ex VR game. The NPC models at the end are amazing.

I'm currently playing Deus Ex Mankind Divided and this demo really brought the universe to life for me.. The weird girly anime theme of this game almost kept me from playing it, however after watching a gameplay video I decided to give it a try. After the first hour of play I couldn't stop playing.

The game is a combination of plants vs zombies, tactical/RPG and anime, a weird combination that somehow works really well. The story takes some time to get going but by the end I was actually interested in finding out would happen.. Its been around for a while.. But its still an awesome game.. I'm going to say the obvious and say this game is cool as ♥♥♥♥, it's in early development but bugs and fixes will be buffed out the chrome to make it even better.

In other terms this plays like a faster power stone with a few new interesting quirks TBH I would recommend this to anyone that wants to have a good time with friends and beat the shot out of each other. SpaceCom brings out the fundamental principles of RTS genre and presents them as a fast-paced pure strategy game.

So much better than Fallout 4 and GTA VI.

I think this is a really emotional game, full of drama, action. Best game ever. 420/69. Incas are pretty good. Spain's OP if you do find a wonder early game. Overall pretty nice!. Super addictive for such a simple concept. I heard a lot of hype about this game but avoided buying it because I knew I'd experience everything the game had to offer within 2 minutes. Turns out that was in fact true, but it's instantly become the first game I spin up when I pull out the Vive. I put on some workout jams in my steam music player and let myself get into the groove of rapidly identifying bombs and swinging away.

Things I'd recommend to improve:

Gravity bomb mode - bomb feels like it takes too much 'force' to keep it going, and the fact that it's able to fall down near your feet makes it really awkward to try and keep the ball alive.

Menus - Other menu buttons remain punchable even after you've punched your main selection. If you do a swiping style punch you can trigger multiple buttons.

Combos - Any kind of tool tip indicating the purpose of combos. I keep my combo score high because it's fun but have absolutely no idea how it's contributing to my score, if at all. Singleplayer in a Worms game is usually a bad mix. The AI wasn't improved so you'll enjoy near impossible cheap shots from them. Even at 50 cents this felt like a rip off.. The idea is entertaining, the first moments of gameplay is fantastic... but you do get bored after a while. Sadly, this game is quite repetitive and isn't even that challenging. You could easily finish this game within moments. Perhaps it would've been better if it had a larger variety of gameplay, and more places to explore. Sorry, but this is a thumbs-down from me.
